3 Port Mini Active PoE Hub

OX-PoE-R-100M
3 Port Mini 100M PoE - PoE Active Hub

OXION®

3 Port Mini 100M PoE - PoE Active Hub

OX-PoE-R-100M Active PoE Extender mainly used for one network transmission of two equipment, features: plug and play,high-spend transmission, low loss, zero delay, wire saving, saving time and labor, suitable for multi-channel monitoring real-time transmission, centralized management, fast and convenient to achieve security system construction, reduce wiring complexity

Port Performance

- Provide 1*10/100 PoE RJ45 adaptive ports Input.
- Provide 2*10/100 RJ45 Output ports for Other 2 Device Transmission.
- Support IEEE802.3af/at full duplex

Easy to use

- OXION independent research and development , high redundancy design, to provide long-term stable PoE power outputs.
- The equipment meets the national CCC standard, fully meets the safety requirements, and is safe and reliable.

The equipment is stable and reliable

- Plug and play.
- Dynamic LED indicator provides simple working status prompt and troubleshooting.

Complete set of accessories

- User Manual

| Front Side PoE Power Inputs	Back Side - PoE Outputs

3 Port Mini 100M PoE - PoE Active Hub

OXION®

Technical Specification

Name	Active PoE Extender
Whole Power Budget	30W
Standard	IEEE802.3af/at
Input voltage	44-55V/0.5A
Output Voltage	44-55V/0.25A
Transmission rate	10/100Mbps
Transmission Medium	Use Cat 5 or better unshielded network cable
Dimension (LxHxW)	88x20x44 mm
Transmission distance	100 meters for the front end and 100 meters for the back end
